

# Flashback 4

Year 6 | Week 2 | Day 1

1) Use the formula  $A = lw$  to work out the value of  $A$  when  $l = 6$  and  $w = 8$  **48**

2) What might the rule be for this function machine?

3) Write  $\frac{2}{5}$  as a decimal **0.4**

4) Divide 2394 by 7 **342**

# RECALL

- Create a table for each function machine.
- Do you get the same outputs when the operations are swapped?

Input	11	12	13	14	15	20	30
Output							

# I CAN SOLVE A VARIETY OF NUMBER PROBLEMS USING FORMULAE AND ALGEBRAIC EQUATIONS

PROBLEM SOLVING (19VIII) 2<sup>ND</sup> MARCH 2020

# LEARNING HABITS?

On level 1, before you start you have 10 points and get 5 points for each star you collect.

I will code the rule to calculate the points for  $n$  stars collected.

Can I score 215 points?

Explain.

Can I score 319 points?

Explain your answer.

Alex

Lee

## GUIDED PRACTICE

1. Can you create a table to show the score for the number of stars ( $n$ )?
2. Can you draw a function machine to show this sequence?
3. Can you write the sequence as a formula (algebraic equation)?

Stars (n)	1	2	3	4	5	6
Points	15	20	25	30	35	40

$$\text{Points} = 5n + 10$$

How many points will you have if you have collected 30 stars?  
 How many stars will you have collected if your score is 210?

On level 2 of the game, you start with 50 points. You gain 25 points every time you collect a ring.

Rings	1	2	3	4	5	10
Points						

On level 3 of the game, your aim is to collect coins. Each coin is worth 150 points. You start with 500 points. Can you complete the following?

Coins	1	2	3	4	5	10
Points						

On level 4 of the game, you start with 200 points. You have 60 seconds to collect as many coins as possible and you score 15 points per coin.

Coins	1	2	3	4	5	10
Points						

# DIVE DEEPER 1

1) I pay for some tickets online. Each ticket costs £25. There is a £8 postage charge.

a) Draw a table showing the costs of tickets from 1 to 10.

Ticket	1	2	3	4	5	6	7	8	9	10
Cost										

b) Draw a function machine.

c) How much would it cost to buy tickets for the whole class (30 children)?

2) I order some photos online. Each photo costs 35p. There is a 75p delivery charge.

a) How much would 20 photos cost?

b) If I spent £6, how many photos did I buy?

# DIVE DEEPER 2

3) A shop prints t-shirts.

It costs £3.20 for the t-shirt.

For each colour you want on the t-shirt, it costs 60p.

a) How much would it cost for a t-shirt with 3 colours printed on it?

b) Geoffrey has £7. How many colours could he have on his t-shirt?

4) Cooking a turkey properly requires the following instructions:

45 minutes + 20 minutes per kilogram.

a) How long does a 3kg turkey need to be cooked for?

b) How long does a 3.5kg turkey need to be cooked for?

5) On YouTube, you have to pay £5 to set up your account. You receive 40p for each view of your video.

a) Draw a function machine.

b) How much money would I have after 150 views?

On level 2 of the game, you **start with 50 points**. You **gain 25 points every time** you collect a ring.

Rings	1	2	3	4	5	10
Points	75	100	125	150	175	300

On level 3 of the game, your aim is to collect coins. **Each** coin is worth 150 points. You **start with 500 points**. Can you complete the following?

Coins	1	2	3	4	5	10
Points	650	800	950	1100	1250	2000

On level 4 of the game, you **start with 200 points**. You have 60 seconds to collect as many coins as possible and you **score 15 points per coin**.

Coins	1	2	3	4	5	10
Points	215	230	245	260	275	350

# DIVE DEEPER 1

1) I pay for some tickets online. Each ticket costs £25. There is a £8 postage charge.

a) Draw a table showing the costs of tickets from 1 to 10.

Ticket	1	2	3	4	5	6	7	8	9	10
Cost	33	58	83	108	133	158	183	208	233	258

b) Draw a function machine.

c) How much would it cost to buy tickets for the whole class (30 children)?

£758

2) I order some photos online.

Each photo costs 35p.

There is a 75p delivery charge.

a) How much would 20 photos cost?

£7.75

b) If I spent £6, how many photos did I buy?

15

# DIVE DEEPER 2

3) A shop prints t-shirts.

It costs £3.20 for the t-shirt.

For each colour you want on the t-shirt, it costs 60p.

a) How much would it cost for a t-shirt with 3 colours printed on it?

£5

b) Geoffrey has £7. How many colours could he have on his t-shirt?

6 colours

4) Cooking a turkey properly requires the following instructions:

45 minutes + 20 minutes per kilogram.

a) How long does a 3kg turkey need to be cooked for?

105 minutes

b) How long does a 3.5kg turkey need to be cooked for?

115 minutes

5) On YouTube, you have to pay £5 to set up your account. You receive 40p for each view of your video.

a) Draw a function machine.

b) How much money would I have after 150 views?

£65

# SELF-ASSESSMENT

- **Some will even use inverse equations**
  - **Some will use formula too**
  - **Most will be to draw tables and function machines**
  - **All will use draw tables to answer questions**
-
