

Fine Motor skills:

Did you know children could build hand strength and improve pencil grasp by using tweezers? These homemade craft stick tweezers are fun to make and a great hand workout!

This activity is brilliant for fine motor skills, hand eye coordination to help develop the key thumb-forefinger grasp element.

What you need: 2 lolly pop sticks, 1 elastic band, 1 medium sized craft Pom Pom (or alternatively you can use cotton wool). Stack the two lolly sticks, put the Pom Pom in between the lolly sticks and then wrap an elastic band just above the Pom Pom. That gives just the right amount of movement between the sticks.

Make Tweezers with Craft Sticks to Build Hand Muscles
