

Musical instruments you can make at home: 🎸🎵

Shake it up with maracas made from plastic bottles and cardboard tubes. Use recycled materials from your home to create a fun rhythm instrument perfect for all children and family members. Let the rhythm move you!

What you need:

- Two small plastic bottles
- cardboard tubes (toilet roll, kitchen roll)
- tape
- scissors
- funnel
- 1 cup of rice
- 1 cup of beans

What to do:

Put some beans and rice inside each bottle using the funnel. If it does not make enough noise, fill it up a little bit more.

To make the handle, cut through the tube and wrap it up around the bottleneck. Use the tape to attach it together.

Use the tape to keep the tube connected to the bottle.

If you have, other colours available you can use tape or paper to decorate it. Just put some stripes here, there and everywhere.

Enjoy show time! Put on your favourite song and have lots of fun.
