

Number challenge:

This is a great activity. It encourages hand-eye co-ordination, angles and numbers potentially as well as being lots of fun!

What you need:

- Empty paper towel rolls
- Scissors
- A shallow container or tray (you can use the bottom of a box, but a large shoebox lid would work as well)
- Pom Pom
- Glue
- Permanent marker

What to do:

Start by cutting the empty paper towel rolls into small sections.

Once you have 10 pieces cut, arrange them randomly inside the cardboard container. Be sure to leave enough room so the pom pom can roll between the pieces.

Then, lift each piece and place a small drop of glue under it. After that, replace it back in the same spot on the container.

Allow the glue to dry and once the glue is dry, write the numbers 1-10 on top of the pieces in random order.

Finally, place the pom pom in the container and then game can begin.
