

Rainbow Activity

You can find the video on the following link:

www.thebestideasforkids.com

What you will need:

Paper Towels

Washable markers or felt tips

Black sharpie

Water

A large bowl

A baking tray or another tray to protect your table

A dish for the water

What to do:

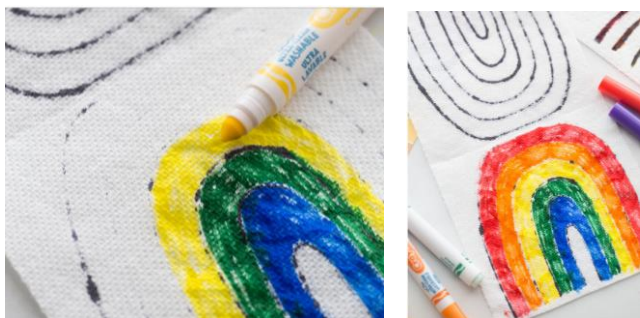

First, fold over 1 sheet of paper towel.

Start by drawing lines for a rainbow with the black permanent marker. You need permanent marker so that the black marker will not bleed.

You want to press hard or go over the lines a few times so that it bleeds through to the second layer of the paper towel.

On the bottom layer, start colouring in your rainbow with washable markers.

Keep adding all of the colours to the bottom layer.

Now it is ready to drop in water! Add some water into a dish or bowl. Then drop it into the water and watch the magic! Your rainbow will appear before your eyes.
