

## DT- Chinese dragon

*Learning focus: cutting, glueing, sticking*

Chinese New Year celebration is here soon, so we start making things for this.

### What you need:

Coloured paper / or white paper coloured in

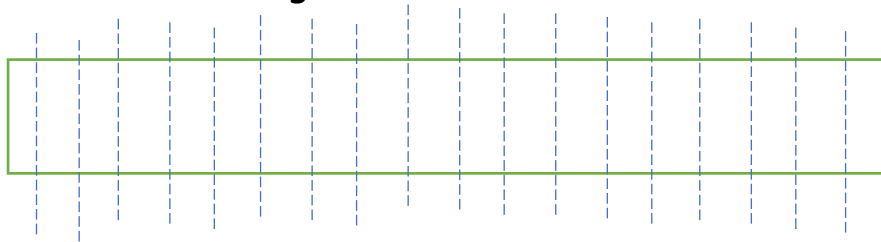

Scissors

String

Parents to draw a bit and small triangle for the dragon's head and tail and a long rectangle.

Children to cut the triangles and the rectangle out, then cut strips from the rectangle, like this:

If you have white paper, ask the children to colour them in.

Children to glue the strips of paper on the string. If this doesn't work, use sellotape to fix the strips on the string. The children should practise cutting and positioning the sellotape! Add the big triangle for the head and the small for the end of the tail. The children can draw the eyes and teeth.
