

Science - Growing Seeds

We are going to grow some cress seeds. This is easy to and your adult should be able to get some from the supermarket when they shop.

You will need:

- Packet of cress seeds
- Clear plastic cup or

1

Take the label off the [redacted] pot and paint a funny face on top.

2

Put some wet kitchen roll in the bottom and put some damp cotton wool on top of that.

3

Evenly spread some cress seeds on top of the cotton wool and press them down gently.

4

Put the pot in a warm place that gets some sunlight, like a windowsill.

5

Watch the cress grow!
This should happen after about 7 days.

You might also want to look at this video to see what happens! Will your cress do the same? We would like you to watch how your cress grows and draw some pictures or take photos. Talk to your adult about the changes you can see and send us a sentence describing it.

 ClassDojo

Send us on Dojo:

Send us some drawings or photographs of your seeds changing.

My seeds have grown white stalks.

(Teaching point: to plants seeds and watch them grow to talk about the changes.)
