MONEY LESSON 4

SWE reason about how they have the correct total and suggest other ways to answer a question.

SW able to use pounds and pence confidently to answer a question.

MW be able to select an amount from a given total.

AW use what they have learnt about money to find a total practically.

RECALL

Choose 5 coins from the box. Draw them in your jotter and total them together.

Who has more, you or your partner? How do you know?

Use your whiteboard to help you. Make sure you separate the pounds and pence.

What is the biggest total you can make with 5 coins? Can 5 coins total more than 1 note?

TO SELECT MONEY ACCURATELY TO SOLVE A PROBLEM

GUIDED PRACTICE

Mr Price is wants to buy some biscuits. He has these coins in his pocket.

A packet of biscuits cost 36p. How could he make 36p exactly?

Put the money in order from smallest to largest.

What other totals could Mr Price make? Could he buy 2 packets of biscuits?

INTELLIGENT PRACTICE

How can you make 26p? Use the coins from the box and draw them in your book.

Circle 56 p.

Which does **not** show 50 p?

Check the value of each coin. What is the quickest way to make the total?

Can you separate the coins into 2 columns. One which shows coins greater than 25p and ones which are less than 25p.

DIVE DEEPER

Rosie says,

I have 43 p in silver coins.

Do you agree?

Explain why.

Make the totals practically.

I can make £2 using 1 coin, 2, coins, 4 coins. How can I do that?
How can I make £2 using 8 coins?

DIVE DEEPER

Use the money to fill the purses.

You can only use each coin or note once.

Cross them out once you have used them.

£10
and 15 p

£5
and 51 p
