Geography lesson 6

Trade (continued)

Definition

The definition of trade is 'the buying and selling of goods and services we want and need'. It involves an exchange of goods (and/or services) in return for other goods and services or money.

There are different scales of trade.

national local international When you trade with When businesses buy, swap or sell When people buy, swap or sell to to other countries. someone nearby. others in the same country. Examples: Examples: Examples: You swap a pokemon card Clothes you can buy in Primark are with a friend. You buy a British apple from a made in other countries like supermarket. The apple has come Bangladesh. from another part of the country. A gardener sells a bag of

lives in another town.

games on Ebay to someone who

carrots that he grew to a

neighbour.

Lots of foods sold in supermarkets are made or grown in other countries.

• In this lesson we are going to focus on international trade.

Before we dive deeper, let's revise the vocabulary we'll need. Can you match the words on the left to the definitions on the right?

Something that is sent out to another country.

Something that has been brought in from another country.

From one country to another.

Buying, swapping or selling things.

trade

international

import

export

Something that is sent out to another country.

Something that has been brought in from another country.

From one country to another.

Buying, swapping or selling things.

Most imports and exports travel from one country to another on huge ships like this one. Those coloured boxes you can see in the picture are called shipping containers. They look small in the picture, but each one is actually the size of a room in a house, and packed with products like food, electronic equipment or toys.

If you order something from another country on Ebay, you have to pay shipping costs. This is why!

Here are some shipping containers up close. You can see how big they are.

In fact, they're so big that some people convert old shipping containers into houses.

What does the UK import?

- The answer is lots of things!
- Everything we want and need cannot always be produced in the UK, so we need to import these things from other countries around the world.
- For example, lots of us like to eat oranges. The climate in the UK is too cold for oranges to grow here, so we have to import them from other countries.

• Look at the labels on the food in your kitchen to find out where it was produced. Fill in the table. How many different countries can you find?

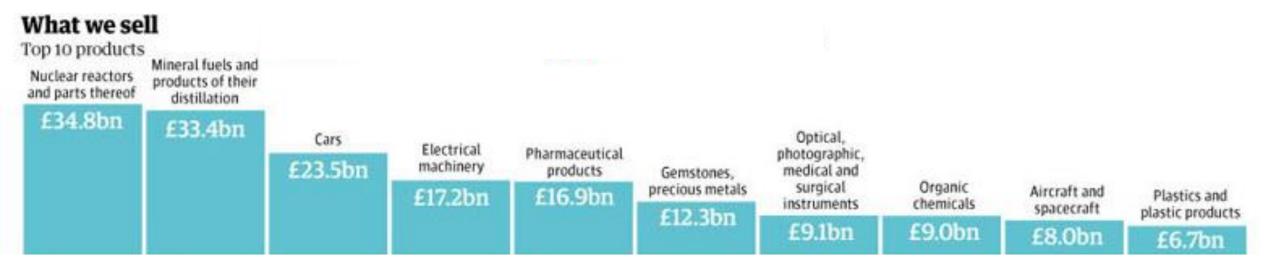

Food item	Imported from

This bar chart shows the top 10 things that the UK exports. Answer the questions on the sheet by referring to the bar chart.

What we sel	11								
Top 10 products Nuclear reactors and parts thereof	Mineral fuels and products of their distillation								
£34.8bn	£33.4bn	Cars £23.5bn	Electrical machinery	Pharmaceutical products	Gemstones, precious metals	Optical, photographic, medical and surgical instruments	Organic chemicals	Aircraft and spacecraft	Plastics and plastic products
			£17.2bn	£16.9bn					
						£9.1bn	£9.0bn	£8.0bn	£6.7bn

What is the UK's top export?	
How much money does the UK make each year by	
selling cars to other countries?	
Which product makes the UK £8 billion a year?	
Why do you think there are no food products in	
the top ten exports?	

ANSWERS

What is the UK's top export?	Nuclear reactors and parts	
How much money does the UK make each year by	£23.5 billion	
selling cars to other countries?		
Which product makes the UK £8 billion a year?	Aircraft and spacecraft	
Why do you think there are no food products in	The UK is too cold and too small to grow a large	
the top ten exports?	range of crops.
